

Festive Event on the Occasion of the International Women's Day 2022

„Gender justice for a global immune system – gender equal out of the crisis“

Keynote & Panel Discussion (with livestream)

Monday, March 7, 2022, 5.00-7.30 pm

Friedrich-Ebert-Stiftung Berlin

In light of recent events:

Peace and security, energy security, and climate protection are core concerns of the G7 Summit, as is the commitment to open, resilient, gender equitable societies and human rights as well as the defense of liberal democracies. Originally, these core concerns of the G7 and also the Women7 Summit came against the backdrop of the Covid-19 crisis. Now events are being exacerbated and overshadowed by a war in Europe, the immediate impact surpassing the pandemic in severity and dramatic consequence. That is why, on the occasion of International Women's Day, we will include the current situation in Ukraine and the impact of the war as part of our event on March 7.

Reverting back to the status quo before the crisis cannot be the solution to the COVID-19 pandemic nor should it be the objective of current politics. We should rather seize the moment to finally make a transition to a more gender equal and just society, economically, politically and socially wise, that leaves no one behind. Therefore, we ask: How can gender-just approaches be used to provide innovative ideas for just and fair politics? How can those approaches help to raise awareness in global societies? And how can they counter future health and modernization crises in a powerful and sustainable way, especially with regards to political, social, and economic dimensions?

As part of our **cooperation with the National Council of German Women's Organizations** (Deutscher Frauenrat), which has been commissioned by the German government to prepare this year's Women7 Summit (W7) in the run-up to the 2022 G7 Summit, the FES is organizing a festive event on the occasion of the International Women's Day, dedicated to the **W7 focus topic "For a gender equal COVID-19**

recovery". It is designed to enrich the civil society coordination process with a prominent kick-off discussion.

This year, the FES invites all those interested to warm up for the International Women's Day **on the evening of March 7, 2022** by watching our event on "Gender justice for a global immune system – gender equal out of the crisis " **from 5.00-7.30 pm** on our website stream or on our FES YouTube channel. This year again we were able to win influential women from politics and civil society for panel discussion.

The whole program will be translated into English and German.

In cooperation with the National Council of German Women's Organizations.

Schedule:

Location: Zoom meeting with livestream
Time: 5.00-7.30 pm
